Service Containers

Built to your specification

Mineworks Group is supplying the mining and industrial market with containers built to meet your specific requirements.

These units are generally built from a standard 20 foot container but, have also available high roof and 40 foot models.

Features and Benefits

- ✓ Self bunded oil area with evacuation point
- ✓ Heavy duty curtain used for loading and service
- ✓ Can fit up to six IBC's and three 205lt drums
- ✓ High quality hose reels, pumps etc
- ✓ Lighting and power (RCD protected)
- ✓ Connect your air source or internal compressor
- ✓ Mine specifications
- ✓ Grease, oils and air outputs from doors
- ✓ Blast and paint
- ✓ Onsite commissioning and service if required
- ✓ Options for storage containers and workshops

Further options and information available upon request

The Mineworks Group Service Containers are supplied to suit your requirements.

These are self bunded with evacuation point and will alleviate the need to build concrete bunding.

Just place the unit where required and attach an air supply (if you choose not to have an inbuilt compressor) and commence equipment servicing.
